Alcohol Use / Dependence Coding Spotlight

Rethinking Drinking

- For your patients who have no other HCC opportunities and who have HTN and drink more than 1 drink a day take the time to remind them not to drink in excess during the holidays.
  - o Remember current guidelines state that patients over 65 should not consume more than 1 drink per day. More recent studies have shown no benefit for alcohol consumption for any patient drinking more than 1 drink per day.
  - o If you have the conversation *use the code F10.99 for Alcohol Use unspecified with unspecified alcohol-induced disorder* to claim credit.

Every New Code Used =
$3,600

When can I code?

- ➢ *Annual Wellness Visits*
  - o Use the Aledade App to capture all HCC Suggestions that are appropriate for the patient.
  - o AWV's require that you update the problem list; you can send all codes across to Medicare!
- ➢ *Follow Up and Acute Visits*
  - o Use the App and if patients have any outstanding codes, use at least one during the visit
  - o If a disease process was used in medical decision making, you can code
